(54) Title: ROOFING INFORMATION INDICATING DEVICE

(57) Abstract: A device for providing an indication of roofing related information. The device includes a first component (1) including a first set (4) of roofing related information, and at least one further set (9) of roofing related information. The positions of the information sets have a predetermined relationship to one another on the first component. The device also includes a second component (2) pivotally connected for relative rotary movement to the first component. The second component has a first information display position (6) for indicating a selected member of the first information set and at least one further information display position (10) for indicating the related member of the at least one further information set.
